

Announcement

Fly-In Andalusia 2017

from 7th - 11th June 2017

[Alhambra – UNESCO World Heritage Site since 1984](#)

Destination airport: Airport Granada – LEGR

Why not Spain for a change?

Yes, we were very pleased to take up this suggestion and after some comprehensive research adopted the motto : "If you haven't seen Granada, you haven't seen anything".

[Granada and its surroundings – the last bastion of the Moors](#)

The dynasty of the Nasrids (1238 - 1492) led the kingdom of Granada to a late flowering, at a time when the rest of Spain was back again in Christian hands.

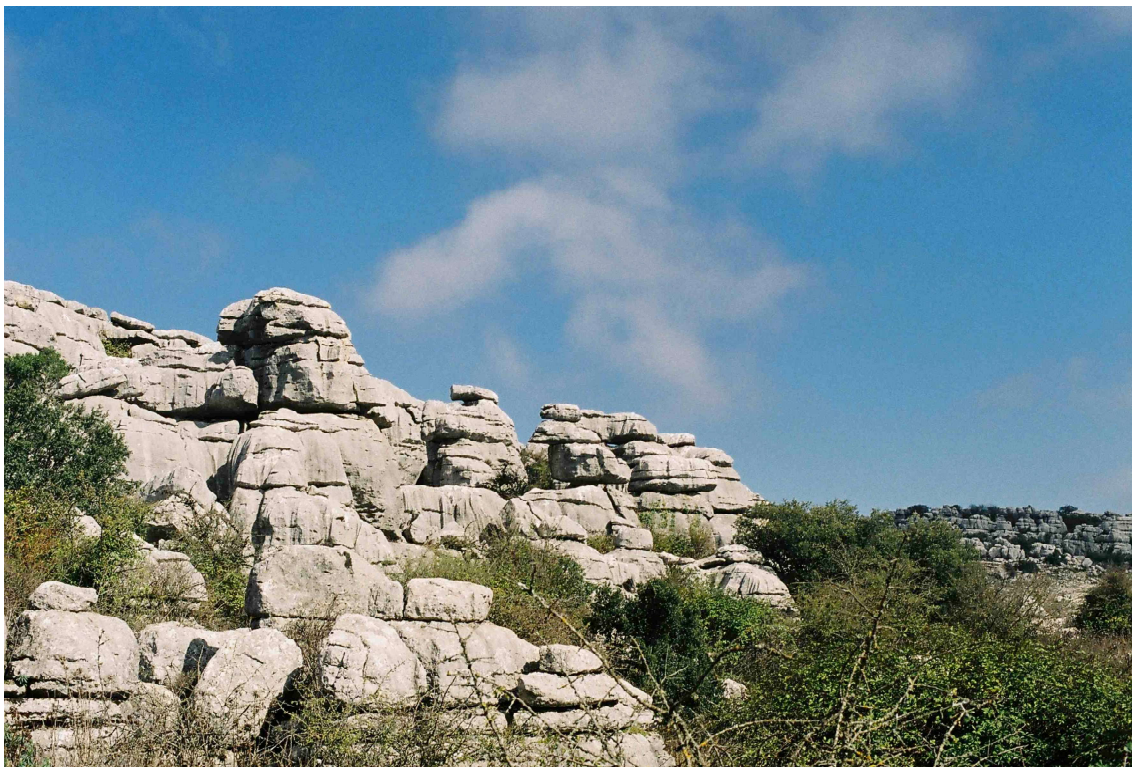

The most precious legacy of the Nasrids is the Alhambra Palace - a spectacular highlight of Islamic architecture. And, of course, a worthwhile place for the MMIG46 to visit.

Our exquisite Hotel, the *Barceló La Bobadilla* is something very special among the “white villages”, located near Loja. Originally a finca and located on a 350 hectare estate, it has been carefully converted into a 5-star hotel.

Olives are obviously the agricultural mainstay in Andalusia. Indeed, some 80% of Spain's olive oil comes from the region.

El Torcal - in the region there's also a fantastic rocky landscape, created by erosion, with impressive karst formations.

Here there are also short one-hour walks around the area.

Or, if you prefer, you have the possibility to look as far as Africa from a special viewing.

What a sight!

Here, for example, the circle which began with the Moors closes once again.

Our Fly-In to Andalusia 2017 is definitely something to look forward to!

So please make a note of the date!

With the best wishes for happy landings!
